

Kill A Watt® GT

Electricity Usage Monitor & Automatic Timer

Are your electric bills costing you a fortune? Cut costs and take control of your electrical appliances with the Kill A Watt Graphic Timer.

This advanced timer has the ability to monitor 2 tasks at once. First, it serves as a catalyst to turn your household appliances on and off as it simultaneously monitors its energy consumption so you can have total control of your electricity usage even when you are not at home. With up to 96 different programmable power on/off event settings per day, and 7 different combinations for the different days of the week, makes this device the smartest, and easiest to use, timer out there.

Not only is it a thrifty devise, but the Kill A Watt GT is also the perfect tool to ward off would-be thieves by turning on and off a connected lamp at random times, giving your empty home the appearance of being occupied. The Kill A Watt function helps you save \$\$ and protects your appliances. Now, you can save energy by using lights and electronics only when you

need them. The built in surge protector also guards your appliance from voltage spikes. With the simple press of a button, you can read the consumption by the kilowatt-hour and calculate electricity expenses by the day, week, month, or year.

Helps save electricity & reduce your electric bill

- Combination multi-event, 7 day/24 hour timer and electric consumption monitor
- Easy to read, backlit LCD display
- Provides clean, safe power by protecting against open voltage, under voltage, and over current
- Soft power-up eliminates harmful voltage spikes

Specifications:

Model:	P4480
Operating Voltage:	120 VAC
Max Voltage:	130 VAC
Max Current:	15 A
Max Power:	1875 VA
Weight:	9.5 oz.
Dimensions:	5 3/8" H x 2 3/4" W x 2 3/4" D

Specifications subject to change without notice.
